

Get discovered by crypto brands that need **real content.**

Blockster is building a network where projects launch branded Stations, and approved creators help them publish stories, interviews, research, tutorials, videos, and event coverage.

Creators do not need to launch a Station.

Stations are for businesses, projects, ecosystems, and media brands.
Creators join the talent side of the network.

Businesses launch Stations

They own the page, audience, publishing calendar, campaigns, events, analytics, and rewards wallet.

Creators contribute

Approved creators can be discovered, contacted, invited, or assigned to help those Stations produce better content.

What creators can contribute.

Articles + research

News, explainers, market notes, tutorials, ecosystem updates, and sponsored editorial.

Interviews + video

Founder interviews, YouTube segments, short clips, product demos, and event recaps.

Events + social

X Spaces, AMAs, webinars, conference coverage, launch campaigns, and social threads.

Why join early.

- Get listed in the beta creator network before Stations begin hiring and inviting contributors.
- Build a profile that shows your beats, formats, portfolio, audience, rates, and availability.
- Get matched with brands that need writers, researchers, hosts, editors, video producers, and event talent.
- Work directly with Stations on paid assignments, retainers, campaign work, or project-based content.

How it works.

1

APPLY WITH YOUR WORK, BEATS, FORMATS,
AND RATES

2

GET REVIEWED FOR THE BETA CREATOR
NETWORK

3

GET DISCOVERED OR INVITED BY STATIONS

Blockster is not asking most creators to pay for a Station. The paid customer is the brand. The creator opportunity is access to Station work.

Apply to the creator network.

We are reviewing creators, writers, researchers, hosts, video producers, editors, and event talent for the beta phase.

Best fit

People who understand crypto, can publish consistently, and have proof of quality work or a relevant audience.

Next step

Submit your profile, portfolio links, beats, content formats, audience, and rates.
